

# Out From The Inside

The Wildhearts

Coming on strong, moving along  
Taking a dive, being alive  
Found us a way (climbing up a rainbow)  
Ending the day (at a place that we all know)  
Pass it around (hitting on the wall now)  
Never look down (that's the way that it all goes)

One step outside, everything is feeling alright  
One step inside, everything is coming alive

Open a line, see what you find  
Get it today, give it away  
How many times (gonna be your last try)  
Too many crimes (did you pay the toll)  
Loving all night (synfetic can't stop)  
Touching the sky (didn't lose control)

One step outside, everything is feeling alright  
One step inside, everything is coming alive  
One step outside, everything is feeling alright

Look away now, run away now  
Turn away from all our faces  
Look away now, run away now  
Turn away from all our faces  
Look away now, run away now  
Turn away from all our faces  
Look away now, run away now  
Turn away from all our faces

One step outside, everything is feeling alright  
One step inside, everything is coming alive  
One step outside, everything is feeling alright

Coming on strong, moving along
