

Can You Find It

They Might Be Giants

Can you find the hidden H where it's hiding?
Is it on the ground or in the sky or part of something here?
Does it fit somewhere inside?
Is there somewhere it can hide?

Can you find it?
Can you find it?
Can you find it?
There it is.

Where's the secret are? Can you see it?
Is it in the train or on the tracks or at the station house?
Is the are inside the tree?
Where oh where can it be?

Can you find it?
Can you find it?
Can you find it?
There it is.

Where is the L?
Is it under the chair?
Is it growing in the hair?
Where could it be?
We have looked everywhere
And I'm sorry to say
That it's part of the H, which isn't fair.

Now, where are you hiding, D?
Oh, you're never gonna find me. But my question to you is, W, where are you hiding?
I have no idea. I've been looking everywhere.

Where is the M?
Is it invisible?
Or is that against the rules?
Where can it be?
Well, it's right in front of you
And I'll give you a clue:
It's an upside-down W.

There are letters everywhere in this picture.
There's A B, an F, a Z, an X, a P, an O, a Y.
There's a sideways letter Q,
The aforementioned W.

Can you find them?
Can you find them?
Can you find them?
Can you find them?

Can you find them?
Can you find them?
Can you find them?

Here they are.
