

## Science Is Real

### They Might Be Giants

Science is real  
From the Big Bang to DNA  
Science is real  
From evolution to the Milky Way  
I like the stories  
About angels, unicorns and elves  
Now I like those stories  
As much as anybody else  
But when I'm seeking knowledge  
Either simple or abstract  
The facts are with science  
The facts are with science

Science is real  
Science is real  
Science is real

Science is real  
From anatomy to geology  
Science is real  
From astrophysics to biology  
A scientific theory  
Isn't just a hunch or guess  
It's more like a question  
That's been put through a lot of tests  
And when a theory emerges  
Consistent with the facts  
The proof is with science  
The truth is with science

Science is real  
Science is real  
Science is real

Science is real
