Remembering

Remember those golden days We used to walk hand in hand I was your friend, your fool, your lover I was your man

I can see you then Smiling, looking straight at me You caught me unawares, I blushed Let's sit beneath this tree

I can't get over the change in you I can't get over the change in me

And I keep on remembering the old days I keep on remembering the old ways

I can recall you running to a sweet shop You stopped Bought me something And you handed it to me

You were my girlfriend then The first that I ever had The first that I ever kissed And the first to make me sad

I can't get over the change in you I can't get over the change in me

I keep on remembering the old days I keep on remembering the old ways

Oh yeah I keep on remembering I keep on remembering

Oh yeah I keep on remembering the old days I keep on remembering

Your pretty dress With the zip up the back I used to love you like that I used to love you like that

Oh yeah I keep on remembering I keep on remembering all about you
