

You were a lady in red when we first met  
I thought to myself this is as good as it gets  
When Harry met Sally there were fireworks  
But nothing like the moment that we kissed  
Just like the movie 'Love Affair'  
At first your feelings just weren't there  
But then like a bed of roses I swept you off your feet  
And now we're meant to be

You send me into orbit when you touch my face  
Far beyond the moon and the Milky Way  
There's never been a love as strong as ours  
Not even in the world of stars

Like "Casablanca" when we parted ways  
I was sleepless in Seattle with some lonely days  
And just like "Pretty Woman" when I saw you again  
But we're more than just a movie  
We're more than just a dream

You send me into orbit when you touch my face  
Far beyond the moon and the Milky Way  
There's never been a love as strong as ours  
Not even in the world of stars

Just like Romeo & Juliet  
My love will never be gone on the window  
Far, and away...

You send me into orbit when you touch my face  
Far beyond the moon and the Milky Way  
There's never been a love as strong as ours  
Not even in the world of stars

You send me into orbit when you touch my face  
Far beyond the moon and the Milky Way  
There's never been a love as strong as ours  
Not even in the world of stars
