

On the Way Back Home

Three Dog Night

Sometimes I'm to the left
Sometimes I'm to the right
Sometimes I'm in between
Sometimes I know what I know
And I know just where I've been
Yeah, sometimes I'm nothing at all
That's why we're making this family call

Oh Lord, won't you shine your light on a poor boy
Won't you light up the road on the way back home
Oh Lord, won't you shine your light on a poor boy
Won't you light up the road on the way back home

Light up the road, light up the road on the way back home
Light up the road, light up the road on the way back home
Light up the road, light up the road on the way back home
Light up the road, light up the road on the way back home

We both know love and we both know pain
Fog and sunshine while standing in the rain
We've all been lonely with no one at all
That's why we're making this family call

Oh Lord, won't you shine your light on a poor boy
Won't you light up the road on the way back home
Oh Lord, won't you shine your light on a poor boy
Won't you light up the road on the way back home

Light up the road, light up the road on the way back home
Light up the road, light up the road on the way back home

Light up the road, light up the road on the way back home
Light up the road, light up the road on the way back home
[repeat till fade]
