

Chemical Ride

Three Years Hollow

Throw it away this time
This could be the only mistake
I make along the way
Watch it as we go by
You've taken all those years
And things that we made for one last ride

Give in to me and tell me I'm right
I want to be your chemical ride
And how I love the things you say to me
Wake up and go live your life
I'll be the best on this ride
And how I love the way you breathe

Watch it as we collide
This could be the one last chance
I'll take along the way
Watch it as we go by
You've taken all those years
And things that we made for one last ride

Give in to me and tell me I'm right
I want to be your chemical ride
And how I love the things you say to me
Wake up and go live your life
I'll be the best on this ride
And how I love the way you breathe

So can you feel the weight again it's all right
You're so beyond me
We learn to fly with our lives
You are the only

Give in to me and tell me I'm right
I want to be your chemical ride
And how I love the way
Wake up and go live your life
I'm going to be the best on this ride
I want to be your chemical ride

Do you really want to waste your time
Wake up and live your life
I want to be your chemical ride
