

Collateral Damage

Thy Disease

Liberation is a fiction
Implementing of a foreign rule
They are hostile
In those desert lands

There are no universal values
Dogmatic point of view
Arrogant force arouses resistance

All the resistance is pointless
Supporting rebels is a treason
Who wow i submit to us is a terrorist
And will be treated as such

Invincible armed forces
Use of guided munitions
Exceptional display of force
Civilians die

You're going down motherfucker
You're going down
You're going down motherfucker
You're going down

So called "collateral damage"
Praise and hurt
Liberation is a fiction
Implementing of a foreign rule
