

Holographic Reality

Thy Disease

Consciousness set at war against itself
By the means of manipulation

Next level evolution, fear stricken minds
Passive chained by control
Weapon of choice is the dust

See the fragments of reality
But the way, you're made to believe

Awaken awareness, the self-realization
Is a weapon of mass destruction
Tear down the threatening walls
Of the brave new slave world

We the perceivers, we are awareness
The war is on your mind
We have no solidity, we are boundless
Newspeak from your mouth
Masters of infinite destiny
Holographic reality

Problem - solution, globalist retribution
Obedient, conditioned, boundlessly
You're entrapped by perception
Controlled by inception

We the perceivers, we are awareness
The war is on your mind
We have no solidity, we are boundless
Newspeak from your mouth
Masters of infinite destiny
Holographic reality

Just a thousand dead souls puppeted into power
Their insanity let loose with total license to kill...

State terror unlimited...

We the perceivers, we are awareness
The war is on your mind
We have no solidity, we are boundless
Newspeak from your mouth
Masters of infinite destiny
Holographic reality
