

Make My Day

Giardina Tiffany

Woke up late
World won't wait
So I make my way downstairs

Mom freaks out
Please don't shout
I still have to dry my hair

I've been up all night
Just thinking you're the one
Who's in my dreams

My heart just keeps on jumping
When I think what we could be

Just go ahead and make my day
You make the world just melt away
When things go wrong and skies are gray
Just make my day, make my day

Second bell
Show and tell
At my locker down the hall

Heart in throat
See your note
And it turns out after all

You've been up all night
Just thinking I'm the one
Who's in your dreams

Your heart just keeps on thumping
When you think what we could be

Just go ahead and make my day
You make the world just melt away
When things go wrong and skies are gray
You just make my day, make my day

We're holding hands
We're walking home
We don't know what to say

But later on
I read your text
You made my day

Here we go! Ha!

Just go ahead and make my day
You make the world just melt away
When things go wrong and skies are gray
You just make my day

Just go ahead and make my day
You make the world just melt away

When things go wrong and skies are gray
You just make my day, make my day
You just make my day
