

All I Ever Want Is You

Tim McMorris

You, were looking at me
I was looking at you
We didn't say much
But well, both of us knew
We knew because we couldn't help but simply smile

I reached for your hand, and that was the start
But then with a kiss, right then you reached for my heart
That's when I knew, ya I knew we would never part

So take me along, take me for the ride
Cause when we're together I'm alive inside
And by all the things you do
Your love always shines through

Ya, all I ever want is You

Some, say it won't last
But we simply laugh
Because we know, they have never had love so true
Like the unforgettable love that we do

I am lost in your world, come be lost in mine
When we are alone, it's like the stars align
And to me you'll always be the brightest start that does shine

So take me along, take me for the ride
Cause when we're together I'm alive inside
And by all the things you do
Your love always shines through

Ya, all I ever want is You
