

Together

Tinchy Stryder

Together
We go together, together, together

My hearts racing like a biker
Somehow I froze up
Chokin' on saliva
Tryna get the words up
All coz I like her
She grew on me, no haircut
But I'm a survivor
Up front
First up
So I've gotta break this
Down to the princess
She could be the one
Now I'm throwing out my index
Saving up her feelings
So im growing interest
Tell her how I feel now
Or live to regret this

Say my name
And again
I don't know how we got here
Boy we ride til the end

And I'll be, I know, before you speak
You wont let me go of me
We face the weather, we go together

And I'll be, I know how much I need, you
Standing here with me
We face the weather
We go together
Together
Together
We go together
Together
Together

It feels far from wrong
It's like the opposite of left
So I called her phone
She said call me in a sec
To tell her in person
I've gotta catch a breath
I go in for a kill
but she's givin for a peck

Maybe it's my fault
Maybe I've gotta look her in the eyeball
And hit her with my love
In the heart from a rifle
Blowing her with kisses
But she ain't taking notice
Tell her how I feel now
or live to regret this

Say my name
And again
I don't know how we got here
Boy we ride till the end

Come & take a ride with me

And I'll be, I know, before you speak
You, wont let me go of me
We face the weather, we go together

And I'll be, I know how much I need, you
Standing here with me
We face the weather
We go together
Together
Together
We go together
Together
Together
We go together

I'm thinkin that it's time to say
Tell you now before its to late
Sky's turning grey, yeah
I'm thinking that its time to say
Grains of sand are slipping away
So whats it gonna be whats it gonna be? whats it gonna be whats it gonna be?

And I'll be, I know, before you speak
You wont let me go of me
We face the weather, we go together

And I'll be, I know how much I need, you
Standing here with me
We face the weather
We go together
Together
Together
We go together
Together
Together
We go together

Together
Together
We go together
Together
Together
We go together.
