

Waiting For The Moon

Tindersticks

We know this place
Where we are doesn't matter
We know this place
We've been here before

The stars are out
Waiting for the moon
The stars are out
Waiting for us

Pull the blanket now
Creep down the stairs
Don't wake the little ones
The lazy cats, the mice are in their homes

The stars are out
Waiting for the moon
The stars are out
Waiting for us

Ease this raging mind, this raging love
Sometimes it feels like a knife
But not tonight
Sometimes it turns like a knife in me, not tonight

The stars are out
Waiting for the moon
The stars are out
Waiting for us
