Feed my head, get me high
Got no life here so
I need to be pacified
one more face, one last show
wasting brain cells
I'm just waiting for the time to go
Hypnotize, hypnotize me

everybody loves you when the nights are long all the lonley people sing your happy songs

zone me out, bleed me dry
drug my senses till I'm
cold a little dead inside
just like god you've become
all consuming bring the world
into every home

Hypnotize, hypnotize me

everybody loves you when the nights are long all the lonley people sing your happy songs

Hypnotize, hypnotize me

everybody loves you when when the nights are long all the lonley people sing your happy songs
