

## Compare Scars

### To Kill a King

Frayed my heart, now your pulling the thread  
So my life's where you lead  
Though I'm lost in ways words can't explain,  
Still I know where I should be

And I know it's hard when they're calling your name  
But keep your head straight, keep your head straight  
I know it's hard when they're calling your name  
But keep your head straight, keep your head straight

On this road we might blindly bloom,  
On this road next to you  
And they'll hand you a rope and slyly smile  
It's in our hands how we swing, we swing

And I know it's hard when they're calling your name  
But keep your head straight, keep your head straight  
I know it's hard when they're calling your name  
But keep your head straight, keep your head straight

Give me something to see me through  
With every glance well you do, you do  
And your eyes a blade and will carve up this scene  
Slice our way through this room, this room

And I know it's hard when they're calling your name  
But keep your head straight, keep your head straight  
I know it's hard when they're calling your name  
But keep your head straight, keep your head straight

Compare scars of love and war  
Some are deep and some are dear  
Compare scars of love and war  
Some are ugly and some are features  
Compare scars of love and war  
Some are deep and some are dear  
Compare scars of love and war  
Some are ugly and some are worth it

Compare scars of love  
[x8]

And I know it's hard when they're calling your name  
But keep your head straight, keep your head straight  
I know it's hard when they're calling your name  
But keep your head straight, keep your head straight
