

# My Love and Me

Toby Lightman

I looked away  
'Cause I knew what you wanted to say  
On that first encounter  
Minding my heart  
Focusing on the straight line  
Never turning left or right

Then the walls came down  
Spun me around  
And you held your ground

And then you came in close, never looked away  
Knew you wouldn't let go  
You said it to my face  
You get my love  
You get my love  
You get my love  
And I could feel my heart beat in my chest  
As you promised me the world, never anything less  
You get my love  
You get my love  
You get my love and me

Head down, tongue tied  
There isn't a word I could use  
To let you know I feel that feeling  
The shivers on my skin  
Now you can see with your eyes  
My heart is right there next to you

Then the walls came down  
Spun me around  
And you held your ground, ground

And then you came in close, never looked away  
Knew you wouldn't let go  
You said it to my face  
You get my love  
You get my love  
You get my love  
And I could feel my heart beat in my chest  
As you promised me the world, never anything less  
You get my love  
You get my love  
You get my love and me

Nothing more to say when you say what you say  
Nothing more to want when I got what I want  
Nothing more to take when you give what you give  
Giving you my love when you love like you're loving me

And then you came in close, never looked away  
Knew you wouldn't let go  
You said it to my face  
You get my love  
You get my love  
You get my love

And I could feel my heart beat in my chest  
As you promised me the world, never anything less  
You get my love  
You get my love  
You get my love and me  
Oh me
