

In My Mouth

Todd Rundgren

I woke up the other morning
Felt like there was something growing in my brain
And I went to see the doctor
He looked me up and down and he could not explain
And this mystery affliction
Seems to reach its peak whenever you're around
I thought maybe you're the one
I'm seeking who knows how to help me out

Come over here
What is this?
There is something in my mouth
Something in my mouth
Might be a word
Could be a kiss
There is something in my mouth
Something in my mouth for you

I have something in my mouth for you
Something in my mouth
Something in my mouth for you

I have tried to understand it
Doesn't really make a lot of sense to me
But as an explanation
I will admit it fits the bill quite handily
Since this form of medication
Seems to be available from only you
I need re-examination
Every now and then until I feel like new

Come over here
What is this?
There is something in my mouth
Something in my mouth
Might be a word
Could be a kiss
There is something in my mouth
Something in my mouth for you

There is something in my mouth
Something in my mouth for you
Something in my mouth
Something in my mouth for you
Something in my mouth
Something in my mouth for you
Something in my mouth
Something in my mouth for you
Something in my mouth
Something in my mouth for you
Something in my mouth
Something in my mouth for you

Come over here
What is this?
There is something in my mouth
Something in my mouth

Might be a word
Could be a kiss
There is something in my mouth
Something in my mouth for you
