Rise To Power

Tom Morello

```
You could just say that managed seicrves only compare to SaaS,
and cloud
computing is a more general term covering all layers   IaaS, Pa
aS, and
SaaS. I would also argue that cloud computing is a lot more tha
n just
managed seicrves. It needs to be agile & elastic, interoperable
, portable,
scalable, monitored & metered, cost-effective, and so on.
```
