

Outerspace Mover

Tom Rosenthal

Sometimes I go to Neptune to sing a little song or hum a little
tune
And I don't know why I go there but I do
I went to Mars the other day, wasn't much there I have to say b
ut
I sure was a long way away from you
If you want to track my movements look into space and there you
'll see
That the Outerspace mover is me
I used to go Pluto but then they said it wasn't so and I felt
A kind of celestial malaise
So now I'm off to Mercury to have some fun in the galaxy oh the
se are the best of all my days
If you want to track my movements look into space and there you
'll see
That the Outerspace mover is me
I flew to Venus on my spacebike, I had a few walks and I had a
few hikes
And I didn't meet anybody there
Oh mostly I just glide around and lark about at the speed of so
und
And take in a bit of cosmic air
If you want to check my movements look into space and there you
'll see
That the Outerspace mover is me
