

## He Loves and She Loves

Tony Bennett

Now that I have found you  
I must hang around you.  
Though you may refuse me,  
You will never lose me.  
If the human race is  
Full of happy faces  
It's because they all love  
That wondrous thing they call love.

He loves and she loves,  
And they love  
So why can't you love  
And I love like too?
