

Little Did I Dream

Tony Bennett

Little did I dream when first we collided
Love was on the scene and fate had decided
It was time that we met
But little did I ever dream

All that I could do was stammer and stumble
Didn't have a clue I'd soon take a tumble
I would never regret
And little did I ever dream

'Cause I didn't see
The great adventure that was waiting for me
I knew exactly what my future would be
I had it all mapped out with no doubt

Then bumping into you was so unexpected
You popped into view, we clicked and connected
It was fate I suppose
And things are seldom what they seem

But one never knows that little did I ever dream

'Cause I didn't see
The great adventure that was waiting for me
I knew exactly what my future would be
I had it all mapped out with no doubt

Then bumping into you was so unexpected
You popped into view, we clicked and connected
It was fate I suppose
And things are seldom what they seem
