

Why Do People Fall in Love?/People

Tony Bennett

Why do people fall in love?
When does the feeling first begin
That found a way to my heart
And make the music start
The second she walked in?

Where do we get this sensation?
Who designed the combination
The desire when she's near
The everlasting fear
That one day she would say goodbye
It's gotta make you wonder

Why do people fall in love?
When do they lose their self-control?
Is there some power in a touch
That sends a crazy rush
Running through my soul?

What do you call this condition
When it hurts so good inside?
I really wanna know
Can someone tell me why

Why do people fall in love?
What little bell goes off inside?
Can't we find better things to do
Something safe and new that I haven't tried?

But here am I needing someone
And I need you till I die
People fall in love
When they fall in love
People, people who need people
Are the luckiest people
When they fall in love
