How Does It Feel

Morning's here I feel so far away It seems like I felt this before All alone Sun burns my skin I can't live with pain anymore And with you on my mind Thinking of all that we've said Were they just words We'll live to regret Why won't you stay? How does it feel To make me fall apart Could this be love Or just a broken heart How do you feel When you see me cryin' again Times have changed Is love at an end? What makes us wonder why? Rearranged Just pretend I can't stand the thought of goodbyes And with you on my mind Thinking of all that we've said Were they just words We'll live to regret Why won't you stay? [Repeat chorus]

Toto
