

## Primal Future

## Toxic Holocaust

First we tear down religion  
Then we break your blind faith  
Lucid of your bleak experience  
Disgusted by the human race

They sky is turning black, you better beware  
Your lungs expand with the poisonous air  
On your knees you beg for death to take you quick

Bio-war brings the message  
The statement spoken loud and clear  
Seeking hope in your religion  
But tell me where are the now?

Bombs unleashed bringing end to all life  
Fire tearing like a cut from a knife  
One your knees you beg for death to take you quick  
On your knees you pry to god to help you now

Rotten city burns  
Toxic waste of space  
Simple pleasures fade away  
Primal future the only way

Primal Future
