

# Something's Different

## Transplants

She loves me (nope), she loves me not  
She done cool either way, she can shake up the spot  
She can take a cab, she ain't came with the drop  
And Imma do something similar, shaking the cops  
Trying to get that, nah bitch alla-kazaam  
Ali Baba in my lungs with a can in my hand  
Trying to make me see it different, I ain't even convinced  
Trying to make it to a place that don't even exist

Something different man, something like a dream here  
Sounds never heard, seen sights I've never seen  
Ain't really much to live for, nothing to believe  
Where I'm at is where it's at, feels something like a scene

Something's different, something's different  
Something's different, something's different  
Something's different, something's different

They say that money make the man, nah the man make the money  
Getting mail like the post office rains when it's sunny  
In the woods where the bears ain't looking for the honey  
You better watch your back, ain't a damn thing funny  
The streets done changed, it used to use crews  
Now every man's for himself, so watch these fools  
Cause they follow no codes, got no loyalty  
And everybody wanna kill a king to be royalty

Something different man, something like a dream here  
Sounds never heard, seen sights I've never seen  
Ain't really much to live for, nothing to believe  
Where I'm at is where it's at, feels something like a scene

Something's different, something's different  
Something's different, something's different  
Something's different, something's different

Something's different, something's different  
Something's different, something's different  
Something's different, something's different

It's like something real different  
And ya'll can feel the earth shifting  
I stay politic-ing in every verse spit  
But I'm still live with the Mary-J blaze  
I'll be the same way when everything change  
And folks turn they back and burn the bridge  
I'll apply the little lessons that we learned as kids  
Trying to really change this world by doing music  
But I need a new drug, like Hewey Lewis  
Something different

Something different man, something like a dream here  
Sounds never heard, seen sights I've never seen  
Ain't really much to live for, nothing to believe  
Where I'm at is where it's at, feels something like a scene

Something different man, something like a dream here

Sounds never heard, seen sights I've never seen  
Ain't really much to live for, nothing to believe  
Where I'm at is where it's at, feels something like a scene

Something's different, something's different  
Something's different, something's different  
Something's different, something's different

Something's different, something's different  
Something's different, something's different  
Something's different, something's different
