

You got to lift up when you feel down
If you need love you'll find it right now
I'll give you the love to make you heal now
If you need love, if you need love

Lift up when you feel down
If you need love you'll find it right now
I'll give you the love to make you heal now
If you need love, if you need love

If you wanna dance we can dance
If you never know that music is the answer
Ever since the dawn of the time
Soundwaves with aroma just a come and rock the night
Can't give up on the trying, you must always run the race
And when your lungs get tired, need to keep up with the pain
No matter if you're independent, and in last place
Make sure that you finish, it's the greatest there is
Cause life is...

It's just one of those days
We need to lift up and give thanks and praises for all
All them good days
We keep on singing those praises

You got to lift up when you feel down
If you need love you'll find it right now
I'll give you the love to make you heal now
If you need love, if you need love

Lift up when you feel down
If you need love you'll find it right now
I'll give you the love to make you heal now
If you need love, if you need love

Lately, I've been thinking
I should show you more love
I never thought I'd be the one that needs some liftin' up
I Find myself thinking about your busiest of days
And every time I see a red rose
I take a sip of rosé
Traveling the world is getting wild
Late night, I take some screenshots
Just to see your face smile
Cause no one is above you my love
And I would never put no one above you my love...

It's just one of those days
We need to lift up and give thanks and praises for all
All them good days
We keep on singing those praises

You got to lift up when you feel down
If you need love you'll find it right now
I'll give you the love to make you heal now
If you need love, if you need love

Lift up when you feel down
If you need love you'll find it right now
I'll give you the love to make you heal now
If you need love, if you need love
