

## New Frontiers

**Trixie Whitley**

The day you'll leave I'll put my white dress on  
Palest skin, lips left alone  
Let me be relieved from what I once believed  
Last night I longed for today  
Today I long for tomorrow  
Wanting to give love another chance  
but our love is tainted

Our love is tainted  
I'm gonna find new frontiers

The limits of this desire,  
like a war for dead saints  
When lovers can't commit  
to a body of passion or faith  
Confined within the language and the past  
of another man, another man  
Liberate me from your scarred directions  
cause our love is tainted

Our love is tainted  
I'm gonna find new frontiers
