

Volcano

Twin Atlantic

You got me 'round that finger
Sickly, twisted, feels good
Running like I'm guilty
You know I'm an innocent fool

You're pushing without warning
Praying that I can heal you
Help me climb back on it
I'm drowning by drinking it too

So if you really want it
Girl, you have to play good
Focus on the feeling
Majestic and misunderstood

Turn it up, upside-down
Lift my feet off the ground
Make me wait, make me pray
Over the volcano
Put it down, underground
It's controlling me now
Make me wait, make me pray
Over the volcano

Don't make me burst that bubble
Cleansing, milky, see-through
Eyes connected to the Gods
Swim in the fountain of youth.

So feel it start to slip right through your fingers
Oh, you're so generous, I'm your redeemer
Ritually relevant
Just keep on taking me to the top
Soak in the acid and fumes.

So if you really want it
Girl, you have to play good
Focus on the feeling
Majestic and misunderstood

Turn it up, upside-down
Lift my feet off the ground
Make me wait, make me pray
Over the volcano
Put it down, underground
It's controlling me now
Make me wait, make me pray
Over the volcano

I'd sacrifice it all
My body and my soul
You bring me back to life
Completely

Turn it up, upside-down
Lift my feet off the ground
Make me wait, make me pray

Over the volcano
Put it down, underground
It's controlling me now
Make me wait, make me pray
Over the volcano

I'd sacrifice it all
My body and my soul
You bring me back to life
Completely
