

# Falling Down

Twiztid

When it rains and it pours  
People they try to ignore  
The storm clouds that forms  
Reality but these renditions  
They visit from door to door  
Be it taxes, bills, and transform  
The caskets and pills overdosing your closest homies  
On the verge of a break down  
My relatives are relatively on their way now  
Flowers and graves but still we stay down  
Till I take a turn, a rest and lay down  
Next to them in the ground  
Sunshine take away the pain now  
It can't rain all day  
All the time, every second  
Always gloomy around mine  
Feeling like I wanna drop it  
And plant it up in the ground  
And each rain drop is another problem falling on down

Still hoping that the clouds just open and everything goes from dark to bright  
Until then my world's waste deep in water  
Ain't no sunlight  
As it rains all day and all night

Nothing but water in my eye as I look into the sky  
It can't rain all the time  
My reply is, "I really don't want to die."  
(X2)

I'm a let the rain fall  
And I let my eyes become one with the window pane  
As I'm riding the crazy train  
And I brought a chainsaw  
Hoping to maim all  
Hopeless and I'm out of my mind  
But besides that we're like exactly the same y'all!  
I put my hand in the sky  
This ain't no game and no lie  
I'm not the guy to be waiting for something to happen  
I make it happen and get it crackin'  
While the normal sit there and they're waiting to die

And the rain will wash it all away  
I keep a look out when I'm not around  
But believe me I'm just a call away  
And it ain't my fault if they  
Can't hang with the rain I bring  
I'll just be part of day and they can fuck with one less thing

Nothing but water in my eye as I look into the sky  
It can't rain all the time  
My reply is, "I really don't want to die."  
(X2)

Yeah

I'm spitting meteor showers  
Spitting nuclear showers  
Check my nucleolus clusters  
I got the spookiest powers  
I am dark and demented  
I'll shoot a nuke at you cowards  
And stick my dick in a groupie  
And fucking puke on your flowers  
Ay  
Lucky that I didn't overdose  
I'm a sober ghost  
Mad child slither like a cobra through the coldest snow  
I'm claustrophobic  
But I'm locked up in a lonely room  
You can look into my nine  
See exploding DOOM  
See I am twiztid  
I'm totally vicious  
I'll brain storm  
And drain storms  
With brain into ditches  
Of course I am afraid of death  
Do we really lay to rest?  
Do we really fly up in the sky?  
Feel my jaded breath

Nothing but water in my eye as I look into the sky  
It can't rain all the time  
My reply is, "I really don't want to die."  
(X2)

Come on!  
Wanna see mortality?  
Does it mean that your battery is never gonna die?  
Giving in a Duracell  
Heavy like an everybody  
No one is ever ready for the trip to the sky  
Why?  
Am I?  
No not quite yet  
But my flow  
Overflow  
Over throws your cassette  
Intense is just a word that I use  
When I serve off crews like a dinner plate  
I refuse to loose  
Cruise interstate  
Then I bruise and abuse and intimidate  
I ain't fading away  
That takes too long  
My patience gone  
My aim is on  
Like an amazon with a boomerang  
I'm ruling this thing  
What school is you in?  
You ain't from hard knocks  
Maybe before knocks  
Old school New York  
Real Hip Hop  
New school West Coast  
We don't shit talk  
We just kick off  
Tip off play up

You soft dude  
So take a day off  
Make a move and I'll improve the pay off  
Improve the layout  
I'm well designed  
And I'm ahead of my time so you should stay up

Nothing but water in my eye as I look into the sky  
It can't rain all the time  
My reply is, "I really don't want to die."  
(X2)
