

# I Knew I Loved You

Ty England

A corner table, you breezed by  
I threw a glance and you caught my eye  
I've never seen your face before  
But I say the light for sure

I knew I loved you  
Right from the very beginning  
I knew I loved you  
And love would never ending

We danced together, you held me tight  
It still felt good come morning light  
I knew it would last from that moment on  
First impressions are seldom wrong

I knew I loved you  
Right from the very beginning  
I knew I loved you  
And love would never ending

You looked at me and I looked at you  
I said the words and you said 'em too  
Ooh, my dreams come true

Now one thing's certain  
As time moves on some things change  
So don't you worry how the cards may fall  
You'll never need a crystal ball
