

Without You

Tyler Ward

I could take a trip around the world see everything
Sit down have a drink with the kings and queens
See my name in lights, parties every night, highest of the high
I could take a trip around the world see everything (everything)

But you know
Without you without you
It wouldn't be worth it
Without you without you
It would mean nothing
I could hear my song playing loud on the radio
And if you're not singing along this is how it'd go
Without you without you
It wouldn't be worth it

Face on the cover of Time magazine
I'm boardwalk baby like the game of Monopoly
One man show, always on a roll, as high as high goes
Just my luck, but luck's not what I need

Without you without you
It wouldn't be worth it
Without you without you
It would mean nothing
I could hear my song playing loud on the radio
And if you're not singing along this is how it'd go
Without you without you
It wouldn't be worth it

Without you without you
This would be nothing
Found you found you
You're really something

Without you without you
This would be nothing
Found you found you
You're really something

Without you without you
It wouldn't be worth it
Without you without you
It would mean nothing
I could hear my song playing loud on the radio
And if you're not singing along this is how it'd go
Without you without you
It wouldn't be worth it

Without you without you
This would be nothing
Found you found you
You're really something

Without you without you
This would be nothing
Found you found you
You're really something
