

Every Night

Tyrone Wells

Got something that I really need to tell you
That's why we're standing out here underneath the moon
You're beautiful, no one kills me like you do
My knees are shaking here we go
This is my truth

I'm not looking for just one night
See what I want is all my life
When we are together it feels just right
I'm asking you for your every night

Well, we both know we can't tell the future
When I dream I see you next to me, girl
Flying free we can take on the whole world
You have my love and it's true
You can be sure

I'm not looking for just one night
See what I want is all my life
When we are together it feels just right
I'm asking you for your every night

No one else
Could ever be the one
Who doesn't try but
Blows my mind like you do
Baby

Monday through to Sunday
Good days, bad days
I want you
Every night
Just be mine, baby

No one else
Could ever be the one
Who doesn't try but
Blows my mind like you do
Baby

Monday through to Sunday
Good days, bad days
I want you
Every night
Just be mine, baby

I'm not looking for just one night
See what I want is all my life
When we are together it feels just right
I'm asking you for your every night

Every night
(Every night, every night girl)
Every night
