

Wake up this nightmare's never ending
Let's all just stop pretending
Ignite the fuel divide and rule
Nirvana lies somewhere in the distance
The path of least resistance
Won't take us there that much is clear

So much to lose but this is more than we can suffer
So let the fires light up the night

Underrated aggravated
Control disguised as social bliss
But I don't want any part of this
Disconnected redirected
Is freedom not worth fighting for
Cry havoc and let slip the dogs of war

Hold tight the landscapes ever changing
A war of words is raging
And all the while the fat cats smile
Stand up shout back until they hear us
Let's give them cause to fear us
It's not too late retaliate

So much to lose but this is more than we can suffer
So let the fires light up the night

Exploitation confrontation
Control disguised as social bliss
But I don't want any part of this
Information revelation
Is freedom not worth fighting for
Cry havoc and let slip the dogs of war

So much to lose but this is more than we can suffer
So let the fires light up the night

Underrated aggravated
Control disguised as social bliss
But I don't want any part of this
Disconnected redirected
Is freedom not worth fighting for
Cry havoc and let slip the dogs of war
