

Shadow of the Beast

Tysondog

Black clouds are massing overhead
Dark angel sent to raise the dead
Bringer of pain and sorrow
No question of tomorrow

Time's up we lose all hell let loose
In life in death your god stays cold and faceless
Take your last breath now you're alone and faithless

A legacy of war and peace
Here in the shadow of the beast
A place of fear and sadness
What price to end this madness

Time's up we lose all hell let loose
In life in death no happy ever after
Take your last breath here ends the final chapter

Out of the darkness a bringer of light

Avenging angel come to me
Absolve my sins and set me free
Free from the ties that bind us
A chance that peace might find us

Time's up we lose all hell breaks loose
In life in death your God stays cold and faceless
Take your last breath now you're alone and faithless
In life in death no happy ever after
Take your last breath here ends the final chapter
