

I Love It When You Smile

UB40

I love it when you smile
When you're with me honey
It happens all the while
How it kills me when you cry
And you know my heart
That's no word of a lie

Everyday you show me something new about you
Honestly I could never live without you
Look at me here's a soul who'll never doubt you
And I will be forever by your side

I love it when you smile
When you're with me honey
It happens all the while
How it kills me when you cry
And you know my heart
That's no word of a lie

Probably the greatest feeling I have ever known
Actually is when you wrap yourself around me
Promise me you'll stay now that I've found you
And I will be forever by your side

I love it when you smile
When you're with me honey
It happens all the while
How it kills me when you cry
And you know my heart
That's no word of a lie

And you could say you've heard it all before
And I know that anyday you may walk out the door
When I say no one will love you more believe me
And I will be forever by your side

I love it when you smile
When you're with me honey
It happens all the while
How it kills me when you cry
And you know my heart
That's no word of a lie
