

California Medication

Ubiquitous Synergy Seeker

Headin' out west
For the ocean
Come along
'Cause I got the notion
That you've been stressed
And it won't go
In the shade of the concrete jungle

No time for us to wait till the morning
But then we'd suffocate from the worry and the grind
A sweet escape for the lonely
Don't pack a thing, gonna leave it all behind

It's okay
We'll be fine
You and I
We'll roll one up and breathe in exaltation
California medication
Take a break
If you want
In the sun
And we could use a dose of good vibration
California medication

When your brain's gone south
Through the blender
Digging in
Like a splinter
I'll fish you out
With the tweezers
From the depths of your deep-sea freezer

No time for us to wait till the morning
But then we'd suffocate from the worry and the grind
A sweet escape for the lonely
Don't pack a thing, gonna leave it all behind

It's okay
We'll be fine
You and I
We'll roll one up and breathe in next exaltation
California medication
Take a break
If you want
In the sun
And we could use a dose of good vibration
California medication

My blood is thick, so write me a prescription
Should do the trick
And patch me up
My blood is thick, so write me a prescription
Should do the trick

It's okay
We'll be fine
You and I

We'll roll one up and breathe in next exaltation
California medication
Take a break
If you want
In the sun
And we could use a dose of good vibration
California medication
