Lights are out, you can't see in the dark Sound is off, you can't hear those wolves bark Take my hand I lead you, guide you, out of here Blind, numb, deaf but still you fight the fear I am your ears, your eyes, you know I'm here Take my hand, I lead you through the valley of night No fear, no more tears, I'm right by your side Come see, the new sun is rising up It wipes away the pain New dawn to rise, to clear the darkness New dawn to feel, to heal your pain New dawn the birth, of new morning sun New dawn with me, to live another day Take my hand I lead you, guide you, out of here Blind, numb, deaf but still you fight the fear Take my hand, I lead you through the valley of light No fear, no more tears, I'm right by your side Come see, the new moon is rising up It wipes away the pain Take my hand!!!
