

# Numb

## Underoath

Get it together, get it, get it together  
We're lying through our teeth  
Now there ain't no fuckin' way out

Get it together, get it, get it together  
We're lying through our teeth  
Now there ain't no fuckin' way out

There ain't no fuckin' way out

I can't connect, I, I can't connect  
Every word I say to you fades into the background  
Open your eyes now, open your eyes  
Can't you see we're drifters floating through the deep end  
Floating through the deep end

We can't just walk away  
We're covered in mistakes  
I think we're numb  
I think we're numb  
There's nothing left to say  
We found our perfect fate  
I think we're numb  
I think we're numb  
We got so numb

We're lying through our teeth  
Now there ain't no fuckin' way out  
We're lying through our teeth  
Now there ain't no fuckin' way out

I can't fake it, I, I can't fake it  
We'll never get this time back  
I'm derailed and off track  
I can't believe it, I, I can't believe it  
This is what it's come to  
My life without you

We can't just walk away  
We're covered in mistakes  
I think we're numb  
I think we're numb  
There's nothing left to say  
We found our perfect fate  
I think we're numb  
I think we're numb  
We got so numb

You are what's real when I need it  
You make me free, I can feel it  
You are my broken state of mind

You are a chemical reaction  
An explosion that keeps on happening  
I'll never get out alive

I can't explain this

Explain the weight that's tied around my neck  
I'm losing all my faith and it's pulling me apart

We can't just walk away  
We're covered in mistakes  
I think we're numb  
I think we're numb  
There's nothing left to say  
We found our perfect fate  
I think we're numb  
I think we're numb  
We got so numb
