

This Time, I Think We Got It Right

Unitopia

This time, I think we got it right
Come and join the journey
But don't hold on too tight
This time, I think we got it right
I think we got it right

With everything we do
And everything we say
We justify our actions
We know no other way

It's a struggle to survive
In this ever evolving world
We adapt to the changes
But have we done things the right way?

Some say there's a light
At the end of the tunnel
But there's always, always
Two sides to every coin

Our future, our hope remains
It's a part of who we are
When everything changes
Have we done things the right way?
