One by One I suffer you gladly One by One You're all I don't need

And you couldn't see, The wood from the tree You're eyes are unkind, So don't look at me.

One by One I suffer you badly, One by One You're all I don't need

And life on the road,
It makes you feel old,
Remember the time when friends were around,
When friends were around when we were all friends;

Is this the way to be? Is this the way to be?

One by One One by One
