

## Only Human

Urma

It's coming...it's my time to let you hide  
Can't keep you trapped inside  
It's here now...it's the point of no return  
Chasing ghosts....memories...alone

Time would not buy me  
Time cannot heal  
Not a chance.

When I awake...I caught sides of my dreams closing doors  
So they can keep me and you without need of control  
In this silent controversy...

Reflections...coloured future in my glass  
Blending shadows with my past  
It's done now...deal the cards...I'll let you play  
Lack of words...describes the day

Time would not buy me  
Time cannot heal  
Not a chance

When I awake...I caught sides of my dreams closing doors  
So they can keep me and you without need of control  
In this silent controversy...

Human...we're only human...just human  
No angels falling in my bed at night.
