

Happy Place

Vaughan Penn

Some people find it in the sunrise
While other people find it in their little child's eyes
Some don't come alive till the night falls
And some folks find the meaning of life when duty calls

But for me is down by the sea
There must be a ready spray, that's where I wanna be
With the wind in my hair, the sun on my face
It always takes me there, to my happy place

My happy place, down by the sea
Darling, take my hand, come with me

There's no place on earth I would rather be
Than stolen by the ocean with my baby
Barefoot in the sand, perfect weather
And I could stay right here with you forever

'Cause for me is down by the sea
There must be a ready spray, that's where I wanna be
With the wind in my hair, the sun on my face
It always takes me there, to my happy place

My happy place, down by the sea
Darling, take my hand, come with me

My happy place, down by the sea
So darling, take my hand, come with me
My happy place, down by the sea
Darling, take my hand, come with me

So darling, take my hand, come with me
