

# She Builds Quick Machines

Velvet Revolver

Hold fast little love  
Burn it strong, let it roam  
Ice cold desert snow  
She build a quick dream  
Sister keep her motor clean  
Sunday visits and a wet machine  
She's always quick to fight  
We'll break her through the night

I can feel it when you pull straight down  
I can feel it when they stood their ground  
Roll over right  
Keep it through the night  
Right, Right  
Keep it through the night  
Right in my sight  
Keep it through the night  
I'll smash right through your spotlight

She ran away to Texas  
To keep away the excess  
Old ex in Vegas, dope, back Texas  
She burn through inheritance  
Danced across America  
At the all night sex show so far from home

I can feel it when you pull straight down  
I can feel it when they stood their ground  
Roll over right  
Keep it through the night  
Right, Right  
Keep it through the night  
Right in my sight  
Keep it through the night  
I'll smash right through your spotlight

What you give is what you take.  
What you bleed is what you break.  
I'd bleed for you.  
I'd steal for you.  
I'd take.
