## **Appalachian Springs**

Does anybody know where we really gonna go I was wondering if it's god damned beautiful You know the thing we cannot trade, forever wrong [Repeat]

Solitude, my secret mood, Appalachian springs On my things Take a step to the left Take a step to the right I saw myself And it wasn't quite right

Does anybody know where we really gonna go I was looking for answers in the sun And the feelings that a man can't control And if the fire burn bright In the deadly night I said that I would never be on their side

Take a step to the left, take a step to the right And I saw myself (and I give it to...) And it wasn't quite right [Repeat]

And I was waiting for... Like a... calling, singing in the sun You said 'I remember '69' I said 'ok'

Solitude, my secret mood, appalachian springs On my things

Take a step to the left Take a step to the right I'm gonna keep it together [Repeat]

## **The Verve**
