

# Every Part Of Me

Victoria Beckham

Oh, no-whoa, look into your eyes

People always talkin' bout  
People always run their mouth  
But when I hold you there's no doubt my love for you is true  
Before my life was ups and downs  
And happiness I used to chase around  
That's why I'm glad you came cos now there's no substitute

And I don't care whatever may come our way  
It's you and me forever and ever to be, cos

When I look at you I see me from my head to your toes every part of me  
And everything you do I did too cos I'll always be a part of you  
(Always be a part of you)  
When I look at you I see me from my heart to your soul I'll always love you  
so  
And everything I do you'll do too cos your every little part of me

I've seen how easy things can change  
And people never stay the same  
But baby ever since you came you made me feel secure  
Yes I think you should know  
That people gonna come and go  
Be assured of this one thing I will still remain

And I don't care whatever may come our way  
It's you and me forever and ever to be, cos

When I look at you I see me from my head to your toes every part of me  
(When I, everything)  
And everything you do I did too cos I'll always be a part of you  
When I look at you I see me from my heart to your soul I'll always love you  
so  
(Oh, oh, I love you so)  
And everything I do you'll do too cos your every little part of me  
(Every little part of me)

I know that there will come a day  
When you have to go away  
But you have no reason to fear I promise I'll be here  
If someone ever breaks your heart  
And you feel your world is torn apart  
My love for you will bring you through hard times  
I'll help you be strong

When I look at you I see me from my head to your toes every part of me  
(Oh, I see me, head to your toes)  
And everything you do I did too cos I'll always be a part of you  
(Everything you do, part of you)  
When I look at you I see me from my heart to your soul I'll always love you  
so  
(Oh, yeah)  
And everything I do you'll do too cos your every little part of me  
(You'll do too, oh yeah)

When I look at you I see me from my head to your toes every part of me

(I see me)  
And everything you do I did too cos I'll always be a part of you  
(Everything you do, always be a part of me)  
When I look at you I see me from my heart to your soul I'll always love you  
so  
And everything I do you'll do too cos your every little part of me  
(Oh yeah, every little part of me, yeah)

Every little part of me  
(You're every little part of me)  
You'll always be my baby  
(You're every little part of me)  
Yeah  
(You're every little part of me)  
Oh  
(You're every little part of me)
