

## Don't Get Left Behind

Virgin Snatch

Ace! - watch the human face  
Before you make the same mistake  
All the scum is kept alive  
By stupid act of grace

Why never I saw you god  
I never saw no miracle  
Freak or mighty - nevermind  
But don't get left behind!

Don't get left behind.  
Nevermind if wheels are on the line  
But kingdom built on lies  
Word's of propaganda!

There is war on our dissent  
Would you tolerance the peace?  
This is sum of your ambition  
From which never got released

All the saint's and angels are gone!  
Spilling own confounded blood  
Reverants start fucking themselves  
Their divine guide is too mad!

Ace - keep the distance now  
Before the system will fuck up  
Holy law means piece of crap!  
Don't look for this in the sky

Now you can join the ranks  
Bank of the celebrity  
We created you. like new brand  
So don't get left behind!

Once there was a compromise  
A name would free us from all lies  
Distorted reality  
The fake that we could leave behind

When I hear unjustified cry  
I say: better for all. let time go by  
So. take the risk of being left again  
If you are the true statesman!
