

### 3 Men Walk On The Moon

Vision Divine

July 16th '69  
We left the earth  
all good in time

Saturn V pushed up strong  
at rocket speed  
we broke through  
the stratosphere

Gravity  
is now so light  
While we continue  
our journey in silence

Touch the ground  
for the first time  
Open the lem's door  
Let's start the moon dance

Ground control  
From this corner of the universe  
The earth is looking blue  
In this corner of the universe  
3 Men walk on the Moon

Look at us touching this pale  
Grey ball up here  
for thousand of years  
Distant untouchable

Now here we are  
fragile and small  
Touching the stars

There's no wind  
and there's no sky  
And all the mountains  
are looking so damn high

Here the loneliness  
is screaming loud  
The panorama is breathtaking though

Ground control  
From this corner of the universe  
The earth is looking blue  
In this corner of the universe  
3 Men have touched the Moon
