

Life's too short to live too fast  
Live & Learn  
The future won't be like the past  
Live & Learn

My momma told me there were better things to do  
Than wonder wildly what I was to those like you  
I spent a lifetime wondering what you think of me  
It's never too late now I'm ready to break free

Wanna learn from my mistakes  
The lessons often come too slow  
A little trust is all it takes  
To let it go

You're not good for my health it's been true all along  
I just can't help myself I need to carry on  
This fire in my heart is making my head burn  
I got a straight start but it's not too late to turn

Two steps forward one step back  
The lessons often come too slow  
Sometimes it's best to jump the track  
And let it go
