

I just hit 'em up
I'm losing my mind
The pressure is building
I gambled my life
A couple thousand on the dice
Scared money don't make no money
Watch what you say you can't take it back
I'm going in
Now watch me double that
Have you heard I can't go like that

Push it from the back let's just watch it all burn
Light it up tonight we'll be taking our turn
Push it down and pull it back
Cause we love the night and we own the blur

Take the nerve back

Again I'm high
Crawling inside
Feeling alive
Losing track of time
Caught in the cycle
The never ending cycle
When you're coming at me you better come correct

The way she moves it back n' forth (closing her eyes, she's wise)
In front of me
Damn'man
No we don't kid and play

Let me tell you I don't love that bitch
I said it, don't forget it, I meant it
I ain't playin' around no more
I don't love that bitch
I said it, don't forget it, I meant it
I ain't playin' around no more

We came through the back
We roll it up
Of the party, about to light it all up
Another round, give me your best shot
Get up let's party
About to pour it all down

Remember that I never forced it on you
Put this gun to your head and pull the trigger now
I wanna warn you that you may see red
Just let me live
Please don't bring me down

Come correct when you're coming to me

I tell myself, yeah you got this
One more pill and she popped it
There's no going home
No sleep

Until the sun rises

Take the nerve back
