

Witches & Demons

Vomitory

Do you believe you're able when it is deepest night
And when your man is sleeping so silent by your side
To walk through closed doors and together drive through
space
With weapons they can't see you kill the human race
You cook their flesh and eat it together side by side
And then there where the heart was you put dry grass
inside
And you got the power to let them live again it's only
a short time
You let the life in them
We're not the seed of Adam and Abraham is not our
Father
We are from the angel who was sent down to hell
We're watchin' out for Mayhem we're different from each
other

We live from your imagination, we can ring your bell
We don't need an apple to show you what is sin
We are from the serpent which let the sinners cry
We are watchin' out for Mayhem we're different from
each other
We live from your imagination, we command you to die
They always are near you when you are sleeping in the
night
They're able to see you when everything is out of sight
They're watchin' inside you, they are the rulers of
your world
So please take good care man and never let them out
Do you believe you're able when it is darkest night to
see the Gabriel Ratchets when they are side by side
The hunter will find you now for your blood he lust
he'll hune you and kil and run you in the dust
